

Trails and Trackers

This activity has been adapted to complete at home and should take about 30mins depending on how long your trail is. It is for the Have Adventures theme award.

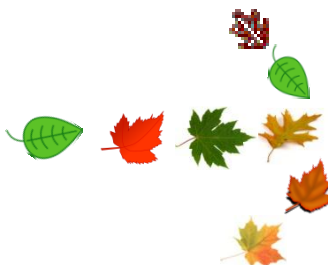

You can do this activity in your garden or around your house.

Where you live it is easy to find your way around as there are street and road signs. But if you were in the wild it can be much harder. So we are going to make our own trails and follow them.

Do you know what an arrow looks like?
Where have you seen them?
Do you know what a trail is?

If you are in your garden look for twigs and leaves, if you are inside find other things you can use to make arrows like pencils.

Now you need to make your trail by making arrows that point the way you want to go. Make a trail around your garden or around your house. Get someone else to follow your trail. Can they make you one to follow?

Don't forget to take photos and send them to your Leaders
